FIELD DAY PICTURES TOO

SEE YOU THERE:
Fri. Sep. 13, 7PM
Rock Valley College

It's been a few months since this paper was printed, and there is plenty of news to report. First, the President of the club, Gene Harlan, is no longer our leader. He has made arrangements with his employer to work steady nights so he can pursue College traing in electronics at R.V.C. in the daytime.

Due to the new schedule, Gene cannot attend any more of the club meetings and resigned his reign as Club President at the July board meeting. It is a great loss to our club not to have Gene's expertise in running club affairs. We all wish you well Gene, and say thanks for a job well done.

Field Day - Diaster Training-

Thats what F.D. is all about as reported at the June meeting, The F.D. Committee had spent hours of preparation to "Get it all together" for the F.D. Contest. Less than an hour before the contest started a 60 MPH wind blew the entire F.D. sight down. Not to be stopped by "Minor Difficulties" our club worked the contest anyway.- Full report at the Sept. Meeting.

At the time of this writing the final figures for the Hamfest are not in. However early indications show that it was a huge success.

This didn't just happen- it was the result of many hours of hard work by the Hamfest Committee. Congratulations to them for a job well done.
